

COMMERCIAL + GOVERNMENT DIGITAL INTELLIGENCE

AWS-native intelligence, deployed inside your own boundary.

Gov-DI brings Digital Intelligence into customer-controlled AWS environments, preserving cloud evidence, investigation context, and decision support for commercial and government teams that require local ownership and deployment control.

REQUEST A DEPLOYMENT QUOTE

Customer-managed AWS deployment. Scope reflects environments, ingest volume, retention, deployment model, and mission requirements.

WHAT THE PLATFORM PRESERVES

LOCAL CONTROL

Run Digital Intelligence inside your own AWS boundary with customer-managed access and deployment authority.

AWS-NATIVE EVIDENCE

Preserve account, service, region, identity, and finding context without losing source relationships.

MISSION DECISIONS

Support prioritized investigations, response actions, recovery verification, and reporting.

Boundary-controlled deployment. Native cloud intelligence.

Purpose-built for commercial and government teams that need local ownership, AWS-native visibility, and a controlled investigation workflow.

Deploy Digital Intelligence inside your AWS boundary.

Gov-DI preserves local ownership, customer-managed access, AWS-native evidence, and controlled investigation workflows for sensitive environments, giving commercial and government teams the intelligence they need without leaving their own AWS environment.
