

Cloud evidence, normalized into decisions at SaaS speed.

IaaS Digital Intelligence unifies AWS cloud evidence into prioritized investigations, environment-wide visibility, evidence timelines, and guided next actions — with the AWS Cloud Edge Agent securely feeding the SaaS platform.

REQUEST A SCOPED QUOTE

Commercial SaaS deployment. Scope reflects ingestion volume, retention, environments, and response requirements.

WHAT THE SAAS PLATFORM CONNECTS

CLOUD SIGNALS

AWS telemetry, service findings, identity context, and region-aware evidence.

INTELLIGENCE LAYER

Normalize, correlate, enrich, and preserve source relationships across the environment.

DECISION OUTPUT

Prioritized investigations, summaries, response guidance, and reporting.

Commercial cloud visibility. One investigation plane.

See evidence across accounts, regions, services, and detections in a single SaaS workflow built for AWS environments.

How AWS Cloud Edge Agent feeds the SaaS investigation workflow.

The AWS Cloud Edge Agent gathers and forwards structured AWS evidence so teams can preserve source relationships while investigating across accounts, regions, services, and detections.
